

## CLERGYMEN ENDORSE

## Duffy's Pure Malt Whiskey.

## Distinguished Divines and Temperance Workers

Who have spent their lives in uplifting their fallen brethren and placing their feet upon the solid rock use and recommend Duffy's Pure Malt Whiskey. These great preachers have been cured of dyspepsia, stomach, throat and bronchial trouble by this wonderful medicine whose virtues they extol. Honored and respected preachers of the Gospel and advocates of temperance without regard to creed or prejudice make frank and outspoken statements of what Duffy's Malt Whiskey has done for them.

Rev. W. N. DUNHAM, D. D.

Gentlemen: In answer to your letter asking if it is true that I have used with success Duffy's Pure Malt Whiskey, I beg to state that such is the fact. Indeed, I do not believe that I would live to-day were it not for your medicine. For many years I have suffered with an affliction of the throat and bronchial tubes, which no medicine seemed to touch, no doctors to reach.

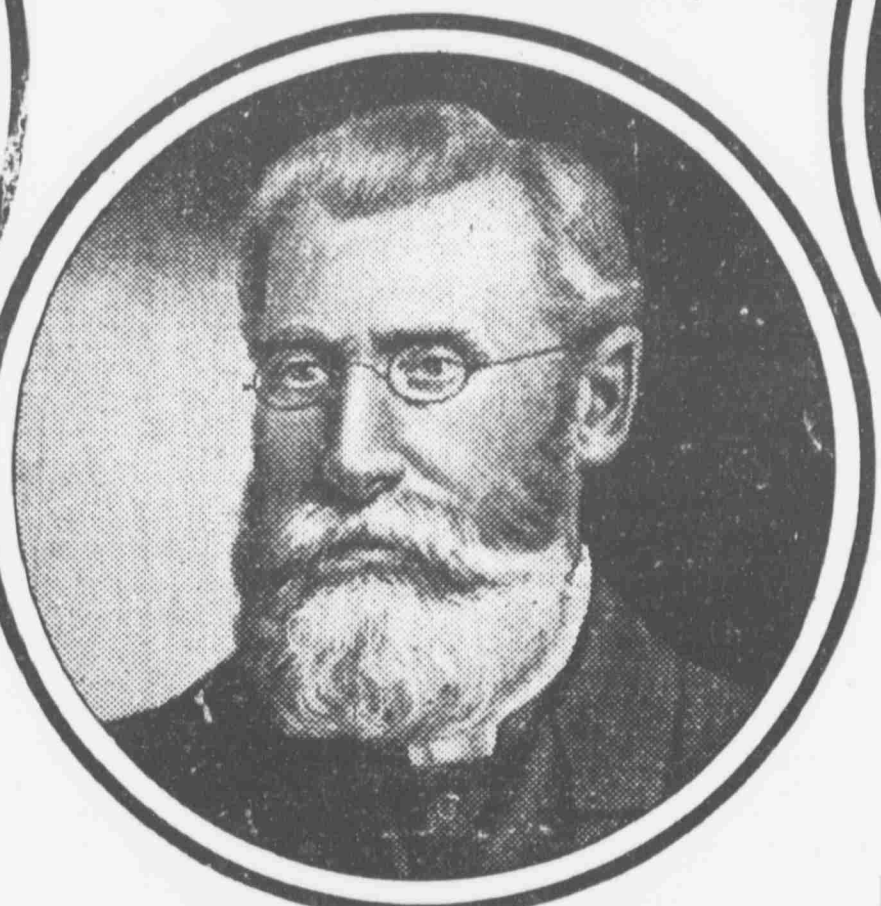

I have taken Duffy's Pure Malt Whiskey for about four months for this complaint and have had great satisfaction from the same, and I believe that its continued use will keep me comfortable. I am an eighty-two year old and can hardly expect to be permanently cured. Though I am an avowed temperance man and a minister of the Gospel, I do not hesitate to recommend and endorse Duffy's Pure Malt Whiskey, a medicine.

—REV. W. N. DUNHAM, D. D.

## The Indorsements from These Eminent Preachers

Are but the outpourings of grateful souls, the letters of men who have been relieved of great suffering and who openly acknowledge the great medicinal value of Duffy's Pure Malt Whiskey. Ministers of the Gospel, doctors of medicine, nurses and people in every walk of life unite in commending the wonderful medicine, the only perfect tonic-stimulant, the one true medicinal whiskey.

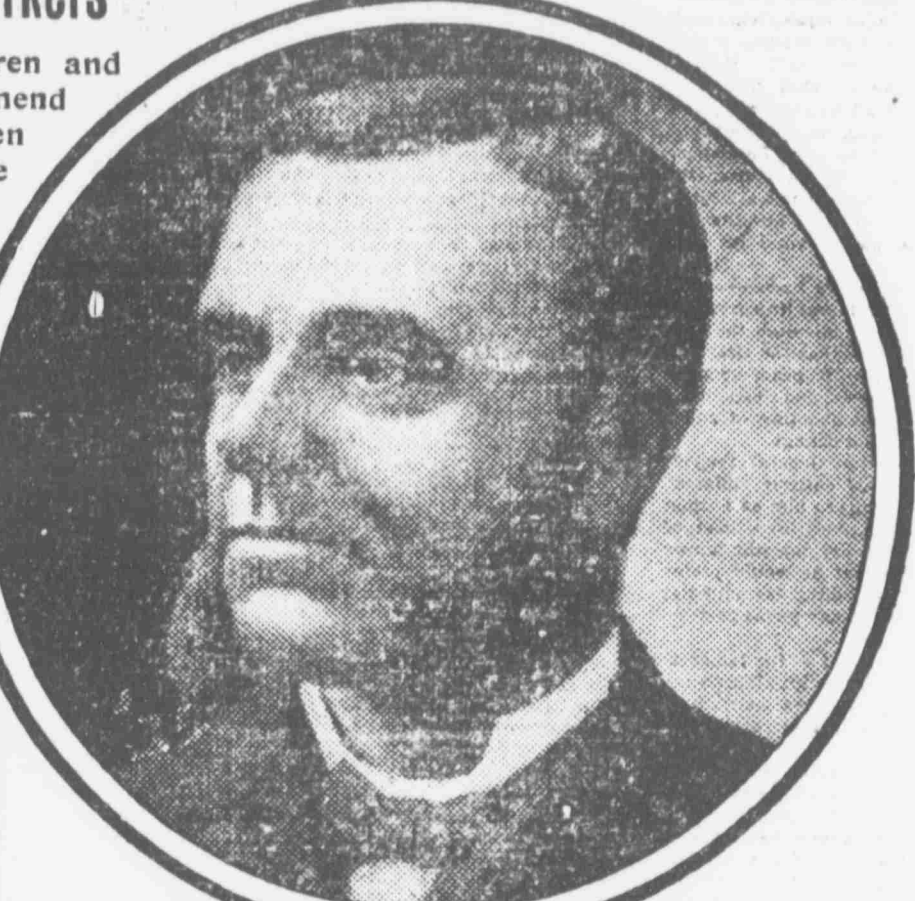

Duffy's Pure Malt Whiskey has carried the blessing of health into more homes during the past fifty years than all other medicines combined. It cures pneumonia, pleurisy, consumption, coughs, colds, grip, bronchitis, catarrh, asthma and all diseases of the throat and lungs; indigestion, dyspepsia and every form of stomach trouble; nervousness, malaria and all low fevers. It tones up and invigorates the heart, and gives power to the brain, strength and elasticity to the muscles, richness to the blood. It brings into action all the vital forces, makes digestion perfect, and enables you to get from food all the nourishment it contains. It is invaluable for over-worked men, delicate women and sickly children. It is a promoter of good health and longevity, makes the old young and vigorous and keeps the young strong.

REV. A. McLEOD, D. D.

On January 22, 1904, Rev. Dr. McLeod writes:—"I am now in my 73d year and have served God fearlessly and to the best of my ability in my chosen calling. For more than forty years I have been afflicted with dyspepsia and nervous prostration. At times I would get so run down constitutionally through over-work as to be disqualified entirely from discharging my ministerial duties. The older I grew the more the disease seemed to prey upon me. The most noted physicians failed to prescribe any medicines that benefited me. I could neither eat nor sleep, and for more than two years I had to take sleeping powders every night. My nervous prostration became well nigh unbearable. But for the grace of God helping me I would not be in the land of the living. Language fails to express the agony of my mind. Something over a month ago I began taking your preparation, Duffy's Pure Malt Whiskey. In the brief period of two days I found that it began to help me. It gave me strength, aided my digestion, settled my nerves, and I have gained ten pounds since taking it."

"I thank God there is such a medicine to be had, and recommend all people with weak, broken-down constitutions, and nervous people especially, to use it. I feel that it will help them. I will be glad to answer any communications in regard to the healing virtue of your preparation. I am a temperance man, and I do not think my position in this matter will be misunderstood."—Rev. A. McLeod, D. D., Greenleaf, Mich.

REV. T. N. HOUGHTON, D. D.

Gentlemen: I want to go on record as saying that I regard Duffy's Pure Malt Whiskey as one of the greatest gifts that God has made to man. I know of many cases of lung troubles that it has cured, and it restored me to perfect health after I had suffered several years with chronic stomach trouble and nervousness, and when my doctors failed to help me. It is indeed a medicine to be thankful for.

And in this connection I want you to understand that I have preached against the liquor traffic for years, and that I have always strongly opposed the use of any liquor as a beverage, and will continue to do so. I am an ordained clergyman in good and regular standing.—Rev. T. N. Houghton, D. D., Bradford, Pa., June 8, 1904.

Duffy's Pure Malt Whiskey contains no fusel oil, and is the only whiskey recognized by the Government as a medicine. This is a guarantee.

CAUTION—When you ask for Duffy's Pure Malt Whiskey be sure you get the genuine. Unscrupulous dealers, mindful of the excellence of this preparation, will try to sell you cheap imitations and flit whiskey substitutes, which are put on the market for profit only, and which, far from relieving the sick, are positively harmful. Demand Duffy's, and be sure you get it. It is the only absolutely pure flit whiskey which contains medicinal, health-giving qualities. Duffy's Pure Malt Whiskey is sold in sealed bottles only; never in bulk. Look for the trade-mark, the "Old Chemist" on the label, and be certain the seal over the cork is unbroken. Beware of refilled bottles.

Sold by all druggists and grocers, or direct, \$1.00 a bottle. Whiskey Co., Rochester, N. Y.

Medical booklet free. Duffy Malt

## KAISER'S AFFRONT TO FRANCE

## MUST ACT NOW OR YIELD IN HIS MOROCCAN ATTITUDE.

England's Support of France a Chief Factor—Italy Slow to Meet German Emperor's Advances—Talk That King Edward May Visit to Tangier.

Special Cable Despatches to THE SUN.

LONDON, April 8.—The Kaiser has supplanted the Czar as the most prominent figure in the European political situation. The change no doubt is mutually satisfactory to the two sovereigns. The rôle which the German Emperor has adopted is still obscure, but it may be assumed that his present activity is part of a plan of German aggrandizement in the great readjustment of international relationships which is certainly impending.

Emperor William has deliberately affronted France in Morocco, and the French press and public have maintained an admirable steadiness in the face of a challenge.

England has still further emphasized this week her support of the French position, and Foreign Minister Delcassé's declaration that the plans of the French would not be altered by Germany's action has forced upon the Kaiser the necessity of some definite action or the abandonment of his empty protest.

It is certain, moreover, that Emperor William is now taking an active advisory interest in the Russo-Japanese crisis. It is of course denied that the visit of Prince Henry to the Czar has any political purpose; everybody believes just the contrary, and Russian opinion is much perplexed over the Kaiser's attitude.

One of the Kaiser's moves toward control of the general political situation which failed to receive public support, the marked political color of his toast to King Victor Emmanuel at Naples, is contrasted with the affectionate sobriety of the King's response. The Italian press, except the Catholic organs, shows no enthusiasm over the Kaiser's encroachments of the Triple Alliance.

Public opinion in Italy, the Rome correspondent of THE SUN says, thinks more of their good relations with France and the traditional friendship of Great Britain than of the necessity for increasing armaments, the Morocco question and other interests dear to the heart of the Kaiser. In fact Italy no longer takes great concern in the affairs of the Triple Alliance.

The comments of the newspapers are all pacific, in marked contrast to the aggressive or ambitious tone of Emperor William's utterances. The *Giornale d'Italia*, one of the leading newspapers of Rome does not hesitate to declare in favor of a readjustment of international alliances.

The *Paris Temps*, in a clearly inspired article today, makes a firm and conciliatory declaration of the French attitude in regard to the Kaiser's demonstration. Germany's action in Morocco, it says, is due either to a misunderstanding or a manoeuvre. If it is the former the French Government freely declares its readiness to explain matters; if the latter France will prove her moderation by offering her resolutions that her intentions are absolutely unchanged. In either case, says the *Temps*, it now behooves those who have modified their opinions or designs to furnish explanations to those who have changed one or the other.

A report finds credence to-day that King Edward in the course of his Mediterranean cruise will pay a brief visit to Tangier.

This will fairly represent English opinion of the Kaiser's manoeuvres, for his action is more strongly resented in Great Britain than in France itself.

BERLIN, April 8.—A despatch to the *Vossische Zeitung* from Tangier says that the Sultan of Morocco has formally granted to German vessels the right to engage in the Morocco coast trade. Hitherto this has been only tacitly permitted.

PARIS, April 8.—The *Journal* expresses the belief that King Edward will pay a visit to Tangier.

## NEW LIGHT ON ANCIENT EGYPT.

Flinders Petrie Believes That the Pharaohs Were Ethiopian.

Special Cable Despatches to THE SUN.

LONDON, April 8.—Prof. Flinders Petrie has returned to Cairo from an exploring expedition to Sinai, where interesting and unprecedented discoveries were made. Memorials of former rulers of Egypt were found which show that it was the custom to erect at the top of mines a picture or effigy of the King under whose direction the mine was being worked.

One engraving represents the Pharaohs with typically Sudanese features. Thus the origin of the dynasty to which this Pharaoh belonged is at last discovered, hieroglyphics under the picture fixing the King's date and name. Prof. Petrie maintains that the origin was Ethiopian.

The most interesting find was a Sennite temple in an almost perfect state of preservation. Its position is forty miles north of the original of the dynasty and builders. Mount Sinai. The designers and builders had evidently taken as a model Solomon's Temple at Jerusalem. Its date is anterior to the birth of Mohammed.

Sir Henry Seton-Karr has also returned to Cairo from an expedition to Fayoum. He found from certain depressions that Lake Kurnah of the ancient times really consisted of a number of smaller lakes. He discovered numerous corn grinders and crushing stones on high ground between the depressions, leading to the inference that it had been the site of ancient settlements. He found flint implements of neolithic origin scattered everywhere. From the discovery of the latter it may be assumed that this was where the Bedouins got the arrowheads which years ago they used to offer for sale.

## The Weather.

The low area which appeared in the Northwest on Friday moved more to the middle of the country yesterday with its main centre over the upper Mississippi and Missouri valleys, and a secondary low area was central over the middle Rocky Mountain region. From the Mississippi Valley eastward the pressure was high, causing brisk to high winds, fair to day and to-morrow; light to sea level. It was slightly cooler in the middle Atlantic and New England States and in Montana and Wyoming. Elsewhere the tendency has been toward warmer weather.

In this city the day was fair and slightly warmer; wind, brisk northwest; average humidity, 45 per cent.; barometer, corrected to read in sea level, at 8 A. M., 30.2; at 2 P. M., 30.1.

The temperature yesterday, as recorded by the official thermometer, is shown in the annexed table:

WASHINGTON FORECAST FOR TO-DAY AND TO-MORROW:  
For eastern New York, fair to-day and to-morrow; light to fresh west wind.  
For New England, fair to day; fair and warmer to-morrow; fresh west wind.  
For western Pennsylvania, New Jersey and Delaware, fair to-day and to-morrow; light west wind.  
For Maryland and the District of Columbia, fair and somewhat warmer to-day; showers to-morrow; light variable wind.  
For western Pennsylvania and western New York, fair and warmer to-day; followed by showers in western portion; showers to-morrow; fresh south-west wind.

## PITCAIRN'S LONE COLONY.

Ways of the 100 Descendants of the Mutineers of the Bounty.

Special Cable Despatches to THE SUN.

LONDON, April 8.—Reports to the Colonial Office just issued, include one on Pitcairn Island, the lonely home in the Pacific of the mutineers of the armed ship *Bounty* who landed there in 1789. The islanders number seventy-seven males and ninety-two females, including children.

They are hard working and more or less healthy, but exhibit certain vicious tendencies which religion has been unable to eradicate. Many are narrow-minded and unstable. They have adopted an extraordinary patois derived from the language of the Tahitian women who accompanied the mutineers to the island. They employ this patois in conversation among themselves, although most of the adults can speak English fairly well and in some instances very well, considering the circumstances of their environment.

There are persons of ability among them, but some few appear to be lacking in intelligence. The children are comparatively numerous and if properly cared for should be useful members of the community.

In regard to the morals of the islanders, in the aggregate, little that is favorable can be said. Illegitimate children, petty thefts, brawls and the use of bad language are common. Fortunately the people do not use intoxicants. The laws and regulations which deal with the above named offences are seldom enforced.

No deformities are noticed, but the front teeth of most of the islanders are bad. This is the only visible result of intermarriage. The people are Seventh Day Adventists and observe the Sabbath scrupulously. They are exemplary in their attendance at weekday prayer meetings and church gatherings. Nevertheless vulgar stories and obscene songs are not unknown.

The Pitcairn Islanders contribute 10 per cent. of the produce of the place and any moneys that are received to the church and they subscribe to Sabbath schools and other religious funds. The produce so contributed is sold and the proceeds, with other cash collections, are forwarded to the foreign mission board of the Seventh Day Adventists in America.

An official who visited the island in May says in a report that he found that the government instituted in 1896, which consisted of a president, vice-president, a judge and seven members of a parliament, was not working well, so he made certain changes.

## RICH MEN LONG LIVED.

Deduction From English Probate Figures—One Millionaire in 1904-05.

Special Cable Despatches to THE SUN.

LONDON, April 8.—Unfortunately for the Chancellor of the Exchequer, the financial year ending March 31 was marked by the death of only one millionaire. For a long time past the average number of wills probated in each year which exceeded in value £100,000 has been between five and six.

This year a Bolton cotton spinner alone left a million, the exact sum being £1,151,378. Of the last six years 1900 was the best from this point of view, when nine estates of the aggregate value of £19,32,665, paid death duties.

Looking over the list of the twenty-four richest people who died in the financial year just ended, it might be deduced that wealth is the surest means to long life. Only one of this number was under 60, one was 60, fourteen were over 70 and six were over 80. The average age was 74 years and 6 months.

## MENINGITIS

Dr. Dunham of the Meningitis Commission says:

"We know that the germ is very 'sensitive and outside of the body easily destroyed. There is no advice to give as to preventatives except to 'keep healthy generally, and particularly careful to stop any trouble in the nose and throat. We know the germ must get into the head in 'some way; it is not created there. 'Any inflammation of the nasal organ might furnish an avenue for the germ 'which under ordinary conditions of 'health might be closed to it.' (N. Y. Herald, April 8, 1905).

Pond's Extract is the oldest, best known and most effective remedy for all diseased conditions of the mucus membranes, and therefore meets all the above requirements. It should be used morning and night as a spray for the nose and throat when diluted with an equal quantity of water.

Caution.—Do not use as a substitute the commercial witch hazel which is sold and represented to be the same as Pond's Extract. Of seventy samples of witch hazel recently purchased from as many dealers in the open market, fifty-two contained Wood Alcohol (poison) or Formaldehyde (poison) or both.

## SHIFTING BRITISH POLITICS.

Opposition to Balfour Government Growing Greater Daily.

Special Cable Despatches to THE SUN.

LONDON, April 8.—The moral to be drawn from the Brighton election, where Mr. Gerald Loder, the Government candidate, was defeated and a Liberal returned for the first time in twenty years, is too obvious to need pointing out. The country is undisguisedly weary of the present government and a majority, even of its own supporters in the press, advocate speedy dissolution rather than the present undignified clinging to office in the face of repeated rebuffs both in and out of the House of Commons.

There was a very general idea in the middle of the week that dissolution would come in May. Now, however, the Government has declared its intention to go on, but it is difficult to see how a general election can be postponed later than August. So far as home politics are concerned the sooner it comes the better, for in the present condition the Government is unable to do anything to the advantage either of the country or itself.

It is possible that an explanation of Prime Minister Balfour's reluctance to appeal to the country may be found in the King's desire that he retain office as long as possible. This, of course, must not be taken to mean that the King is influenced in any way by political partisanship, but with European affairs in their present involved condition it is natural that the King should desire a continuity of the British Government until foreign affairs have assumed a more definite shape.

Broadway. **Saks & Company** 33d to 34th St.

An Extraordinary Sale of  
**Tailored Suits, Dresses and Coats**  
INCLUDING A SERIES OF MANUFACTURERS' SAMPLE GARMENTS  
At Extremely Low Prices.

WE ARE PREPARED TO ACCEPT FURS FOR STORAGE.

## MEYER'S NEW HOME.

Our Ambassador to Russia Rents the Kleimichel Palace.

Special Cable Despatches to THE SUN.

St. Petersburg, April 8.—Ambassador Meyer has taken up his residence in the Kleimichel Palace, which was once occupied by the Spanish Embassy. It is an imposing building upon the Sereselskai, which is one of the most fashionable streets in the city, and it has one of the most gorgeous interiors in St. Petersburg. It is in the neighborhood of the French and other principal embassies.

## SAY FAREWELL TO HENRY WHITE.

Distinguished Company at the Station When He Leaves London.

Special Cable Despatches to THE SUN.

LONDON, April 8.—Henry White, the newly appointed Ambassador to Italy, left for Rome at 5 o'clock this afternoon. Lord Lansdowne, Secretary for Foreign Affairs; Mr. Brodick, Secretary for India; Count Bernstorff, Secretary to the German Embassy; and many others were at the railway station to bid him good-bye. Premier Balfour dined with Mr. White yesterday.

## BOYS RAN THE ELEVATOR.

Girl Fell Down the Shaft and May Die of Injuries—Janitor Locked Up.

Special Cable Despatches to THE SUN.

Sarah Lichtenstein, an eight-year-old girl, who lives on the fourth floor of the six-story apartment house at 199 Forsyth street, fell down the elevator shaft from the fourth floor to the basement yesterday. Both her thigh bones were fractured and she received internal injuries which it is feared will cause her death. She is at Gouverneur Hospital. Samuel Comport, the janitor of the house, was arrested on a charge of criminal negligence. This is the third accident of the sort in the house. It is said, two others proving fatal.

According to the stories of the tenants, Sarah went in with her three-year-old brother Hyman and found the elevator runner "George," a colored man, gone. Some boys playing about volunteered to take her up in the elevator, and she accepted. Moses Ball, an eight-year-old boy, who lives on the same floor with her, ran the elevator, they say, and a half a dozen more boys got in. The elevator stopped at the fourth floor all right, and Sarah pushed little Hyman out ahead of her. Then as she started to step out the elevator suddenly

jerk'd up. She tottered and fell the whole length of the shaft. Ball could not be found after the accident. The elevator ran to the top floor, where the boys got out and scattered. Tenants of the house declare that frequently the boys are allowed to run the elevator. A druggist near by says that two boys fell down the same shaft some time ago and were killed. Sarah's mother has a baby only a few days old, and it is feared the shock of her daughter's accident may result seriously for her.

Dentists prescribe CHENEY'S LISTERED TOOTH POWDER because it contains "Listerine," the best known mouth antiseptic and decay preventive. Palmer Cox Brownie Book free coupon in every box.
